Excellent quality and vivid colors. Possibility of printing full color graphics, photos.

Artwork Graphics

File type: Vector Corel or EPS.

The final Artwork Graphics provided by the client must be with the following dimensions:

Body - flat 86 cm x 64 cm

Sleeves - flat w / 55 cm x 30 cm

Everything that relates to text or logos should be 25 to 30 cm in length maximum.

- especially in the front

- and centered vertically in the plane.

Regarding the front of the t-shirts, the images, logo or text should be at least 20cm from the top of the plane, because of the collar's construction.

On the back it is enough to be 5 cm from the top.

With Sleeves these same logos or text must be 12 cm in length maximum and at least 7 cm apart from the base of the plane.

As much as possible, avoid the continuity of the graphics from one face to another, or the sleeves, as it will always be difficult for them to hit correctly.

Always take into account an inner margin of 2.5 cm all the way around for the stamping, especially so that the graphics are not " cut ", except in cases where the intention is precisely that.
